evo RANGE

COMPACT AND COST-EFFECTIVE BELL-TYPE PACKAGING MACHINES

The **evo LINE** has evolved from the first bell-type packaging machine patented by **MINIPACK®-TORRE** in 1976. Innovative and versatile, these new packaging machines are equipped with highly advanced and

newly patented systems – all at realistic prices and without compromising on the quality and reliability that has always set the **MINIPACK®-TORRE** branded packaging machines apart.

PERFORMANCE

High performance steel resistance: shrinking time reduced by 50% and heating time by reduced 60%.

Sealing bar cooling: means increased productivity and improved sealing.

ONLY FOR FM75 evo AND FM76 evo MODELS

Scrap winder: productivity increased by 20%.

COMES AS STANDARD ONLY FOR FM75 evo AND FM76 evo MODELS

GREEN SPIRIT

Comfort Zone Fan Stop: an eco-solution providing 20% energy savings and greater operator comfort during packaging by stopping the fan when the chamber is opened.

RELIABILITY AND QUALITY

Soft Shrink fan speed adjustment: perfect heat shrinking even for the lightest or most flexible products. Sealed areas do not open. Very low decibel noise levels. Exclusive patent.

EASY MANAGEMENT

Latest generation control panel: top-quality components. 4-digit screen.

MINIMA evo

TECHNICAL FEATURES

Electronic board with optimal sealing and shrinking control, with 10 preset programs that can be selected on the display. 4-digit display.

Extra wide reel support to house standard Ø250x320mm reels: extended operation and few production stops.

TECHNICAL DATA

Electrical power supply V 200/230 1Ph
Maximum power installed kW 1.2

MAX reel dimensions mm Ø200 x 350
MAX product size mm 350 x 240 x 140
Machine dimensions with the lid open mm 930 x 550 x h.580
Machine dimensions with the lid closed mm 930 x 550 x h.370
Weight (Net/Gross) kg 36/48

OPTIONAL FEATURES

2nd tabletop reel support
Carriage

MINIMA has always been the smallest model of the range of packaging machines marketed by **MINIPACK®-TORRE**.

Designed for small to medium-sized production operations, its strong point is in its combination of versatility and compactness.

Its absolute reliability and high efficiency, combined with low energy consumption and ease of use are features that make the **MINIMA** model machine truly unique in its class.

REPLAY 40 evo and REPLAY 55 evo

REPLAY 40 evo and **REPLAY 55 evo** models combine significant technology features with an economical and compact design that focuses on the essentials without ever losing sight of the excellence typical of all **MINIPACK®-TORRE** machines.

MINIPACK®-TORRE continues to hold true to the pioneering spirit that has always been its hallmark. In fact, it was the invention of the first bell-type packaging machine that brought the company into being more than 40 years ago; it was in 1976, then, that it gained its first patent. But innovative ideas march ever onwards.

MINIPACK®-TORRE, after years of research and development, is now launching a new range that brings together all the qualities of reliability, ease of use, and toughness of its compact packaging machines.

RP85 and FC77

NEW TECHNICAL FEATURES

- Innovative upper hood fastening: simplified maintenance and enhanced stability
 - Sealing blades safety control: enhanced machine safety
 - Support with larger reel diameter (to 300 mm): suitable for micro-punched film to pack bread
 - Packaging plate separated from the reel support: suitable to package even very small products with the same film reel
 - Innovative micro-perforator: continuous and optimal perforation
 - New ultra-flat tactile membrane: waterproof and with intuitive graphics not associated with the board
 - 3-digit display: visibility and comprehensive information
- Board with 10 programs to meet any programming need
 - Piece counter included: a more exhaustive supply of equipment
 - Board access through a door: easier maintenance from the front
 - Longer screened plate: chamber opening flap protection
 - Boosted fan motor: superior shrinking performance
 - Added safety thermostat installed directly on the resistor of the heat chamber: greater safety for the machine
 - Glue-less neoprene rubber support: easy to replace, does not require the use of glue.
 - Standard sealing bar cooling: optimal sealing (only for FC77 model)

The **FM90 DIGIT** is the largest model in the bell-type machine range, and is ideal for packaging large items while maintaining the range's usual productivity and quality. The **FM90** model is made entirely of painted steel and can meet any and all production requirements.

Key features of this model include: factory-fitted sealing and shrinking magnet, six different programs, sealing by means of adjustable impulse blade, safety thermostat, adjustable work surface and sliding carriage, film micro-puncher and motorized scrap winder.

Two operating modes: sealing only and sealing with wrapping.

PLC PRESENT ON ALL 3 MACHINES

- The graphic touch-screen control panel has an userfriendly menu in 8 different languages, with 10 easyto- manage storable programs to meet all programming needs.
- The LCD 3.4" display offers visibility and comprehensive information.
- The USB communication port allows immediate software updating in the event of maintenance operations.
- Possibility of "automatic" working cycle (processing cycles in sequence and programmable pause interval) or "manual" (individual working cycle).
- The control logic is managed by a Schneider Electric PLC, with capillary service and components that can be procured practically everywhere.
- The PLC can be accessed through a hatch on the front for easier maintenance.

NEW TECHNICAL FEATURES

- **Hood automation:** increased productivity

FM76 A evo and FC77A

NEW TECHNICAL FEATURES

- Graphic touch-screen control panel with: Intuitive menu with 10 user-friendly programs that can be preset Menu in 8 languages (IT, EN, DE, FR, ES, PT, CS, RU) USB port for any software updates Standard Schneider Electric PLC control logic with widespread assistance
- Option of having an 'Automatic' work cycle (press the start button cycles performed in sequence, interrupted by the programmed pause interval) and a 'Manual' work cycle (press the start button to perform one packaging cycle)
- Wire product evacuation mesh belt
- Shrink fan stop
- Standard sealing bar cooling: optimal sealing
- Adjustable chamber opening according to the product height: reduced loss of hot air and resulting energy savings, higher production speed
- Innovative upper hood fastening: simplified maintenance and enhanced stability
- Sealing blades safety control: enhanced machine safety
- Support with larger reel diameter (to 300 mm): suitable for micro-punched film to pack bread (only for FC77A model)
- Packaging plate separated from the reel support: suitable to package even very small products with the same film reel
- Innovative micro-perforator: continuous and optimal perforation
- Chamber opening blade protection
- Boosted fan motor: superior shrinking performance
- Added safety thermostat installed directly on the resistor of the heat chamber: greater safety for the machine
- Glue-less neoprene rubber support: easy to replace, does not require the use of glue

NEW TECHNICAL FEATURES

- **Automated plate:** higher productivity

OPTIONAL FEATURES

Stainless steel packaging plate
Blowing unit
High hood 300 mm
High hood 490 mm (only for FC77A model)
Film opening sheet metal
2nd tabletop reel support
Roller conveyor lg. 1 m
Blade internal front protection

SYNTHESIS INOX

SPECIALLY DESIGNED FOR THE FOOD INDUSTRY

SYNTHESIS INOX is ideal for food packaging – e.g. pizza, sweets, or bread – all easily and hygienically.

The new globally-patented forced ventilation system located on the back of the machine enables the maintenance of constant temperature with no overheating.

The machine is easy to clean – and totally hygienic too – because it has no motors, fans or a felt-bottomed hood.

High-efficiency sealing and shrinking for any film type can be performed simultaneously by using settings directly viewable on the display screen.

This mix of technological innovations brings significant energy savings (up to 20%).

TECHNICAL DATA

MANUAL OPTIONALS

SMOKE INTAKE

The smoke intake is installed with a special knock-out hood on its back; it is also equipped with an active carbon filter to reduce the smoke produced during sealing which escapes when the hood is opened. It is ideal for PVC film users. Smoke is sucked in and filtered using the crossflow fan thus keeping the air in the operator's work area clean.

FAN TECHNICAL DATA:

- Voltage: 230 V
- Infeed power: 80 W

OPTIONAL ON THE FOLLOWING MODELS

AF310A01 FM75 - REPLAY 40 evo
AF320A01 FM76 - REPLAY 55 evo
AF350A01 FC77 - FC77A - RP85

FILM OPENING SHEET METAL

This option facilitates the insertion of products on the packaging plate.

OPTIONAL ON THE FOLLOWING MODELS

FM095280 FM75 evo - REPLAY 40 evo
FM095279 M76/76A evo - REPLAY 55/55C evo - Synthesis - Eco Modular - Modular 50S - Media Matic
FM095249 FC77 - FC77A - RP85 - Modular 70

SCRAP WINDER

The scrap winder collects the off-cuts from the sealed film thereby enabling tidier working practices and also saving time during packaging.

OPTIONAL ON THE FOLLOWING MODELS

AV990A17 REPLAY 40/55/55C evo
AV020A80 Synthesis

HIGH HOOD

OPTIONAL ON THE FOLLOWING MODELS

KR320040 Upper hood H=300mm
 FM76/76A evo - REPLAY 55/55A evo
 The 300 mm high hood enables the packaging of products up to a maximum height of 300 mm.

KR350040 Upper hood H=300mm
 FC77/FC77A - RP85
 The 300 mm high hood enables the packaging of products up to a maximum height of 350 mm.

KR350041 Upper hood H=490mm
 FC77/FC77A - RP85
 The 490 mm high hood enables the packaging of products up to a maximum height of 500 mm.

STAINLESS STEEL AIR DEFLECTOR

Recommended option for those who have to package very large products. The air deflector prevents the hot air generated by the fans from blowing directly against the product to be packaged.

OPTIONAL ON THE FOLLOWING MODELS

FM091332 FM75 evo - REPLAY 40 evo
FM091332 FC77 - FC77A - RP85 (No. 2 pieces)
FM090335 FM76/76A evo - REPLAY 55/55C evo

STAINLESS STEEL PACKAGING PLATE

The stainless steel packaging plate ensures hygiene and ease of cleaning. As such, it is highly recommended for the packaging of food products since it is the only part of the machine that actually comes into contact with the product to be packaged.

OPTIONAL ON THE FOLLOWING MODELS

KR310042 FM75 evo - REPLAY 40 evo
KR320042 FM76/76A evo - REPLAY 55/55C evo

PB32N001 FM76/76A evo - REPLAY 55/55C evo
PB02N080 Synthesis
PB02N000 Eco Modular - Modular 50S

BLOWER

The blown air lifts the film into the product insertion area, making it easier to place the product on the packaging plate.

BLOWING UNIT TECHNICAL DATA:

- Voltage: 230 V
- Infeed power: 80 W

OPTIONAL ON THE FOLLOWING MODELS

GS000011 FM75/76/76A evo - REPLAY 40/55/55C evo - Eco Modular - Modular 50S - Media Matic
GS000012 FC77 - FC77A - RP85 - Modular 70
GS020A80 Synthesis

LARGER REEL SUPPORT KIT

The "larger" reel support enables the mounting of reels of maximum 1000 mm width strips on the machine.

OPTIONAL ON THE FOLLOWING MODELS

KR350043 FC77 - FC77A
KR350044 RP85 - Modular 70

2ND TABLETOP REEL SUPPORT KIT

This support, placed on the floor or on the tabletop, allows for easy use of two reels with different strips. This saves time in case of frequent packaging of products of different sizes.

OPTIONAL ON THE FOLLOWING MODELS

PB31N002 FM75/76/76A evo - REPLAY40/55/55C evo - Minima evo - Synthesis - Eco Modular - Modular 50S - Media Matic
PB31N002 FC77 - FC77A - RP85 - Modular 70 (No. 2 pieces)

SEMI-AUTOMATIC RANGE

MAXIMUM FLEXIBILITY,
MINIMUM EFFORT

MINIPACK®-TORRE produces manual and semi-automatic angular packaging machines perfect for all kinds of requirements. Ideal for small and medium-sized enterprises that have to pack up to 900 pieces/hour and want to deliver professional shrink-wrap packaging to the same standard as high-end industrial packaging.

The range of semi-automatic angular packaging machines offers four models that ensure maximum precision and speed. The first – **MEDIA** – already has a shrink **TUNNEL** built into the mono-block structure. The other three need to be combined with a shrink tunnel if shrink-wrapped packaging is required.

MEDIA

MEDIA is **MINIPACK®-TORRE**'s latest addition to its semi-automatic modular angular packaging machine range, offering a mono-block structure that sets it apart from the other models. In particular, the shrink tunnel – which is equipped with a system to regulate speed, height and packaging temperature – is fully integrated with the sealing unit, thus making the machine's structure versatile and compact.

MEDIA offers an enviable range of high-profile technical solutions, including electronic regulation of sealing time and teflon-coated blades ensuring the complete absence of smoke. At the same time, this angular packaging machine comes with full functionality as standard: sealing bar and motorised scrap winder supplied. **MEDIA'S STEEL IT** finish version is ideal for the needs of the food and pharmaceutical industries.

In short, **MEDIA** is a perfect packaging machine for all companies that think big!

ECOMODULAR

A wide sealing surface of 540x390 mm is the key feature of **ECOMODULAR**, a manual angular packaging machine that is simple and practical to use. The sealing blade, positioned at the bottom, is equipped with a simple and effective temperature control system and enables optimal

sealing with all types of film. This machine is available in a version with automated unloading belts and can be used with the **TUNNEL 50**. This solution makes it possible to obtain perfectly shrink-wrapped packages that can meet any type of packaging requirements.

TUNNEL

FLEXIBLE AND UPDATED SOLUTIONS TO GET THE BEST PACKAGING

The **TUNNEL 50**, **50 TWIN** and **70** has been designed to be perfectly integrated with the Pratika automatic packaging machines. They solve the needs to pack the products with great technical and esthetical results. The technical and aesthetic updates can meet a number of packaging needs in a flexible and effective manner with a wide variety of heat-shrink films.

The **INOX** versions are ideal for the needs of the food-processing and pharmaceutical sector.

TECHNICAL DATA

- Electrical power supply V 200/208/220/380 3 Ph
- Maximum product dimensions mm 650 x 350 x L. *(The lenght depends on shape of product, belt speed, type of film, ...)*
- Machine dimensions mm 2770 x 1160 x h.1640
- Cart weight (net/gross) kg 415/483
- Tunnel infeed dimensions mm 680 x 390

TUNNEL 50 TWIN

TUNNEL 50 TWIN INOX

TECHNICAL FEATURES

- Manual belt height adjustment
- Digital display with 9 programs that can be selected and customised
- Option of selecting the auto-rotating feature for the rollers
- Product conveyor
- Adjustable double air baffles
- Auto-off program
- Outfeed roller conveyor provided as standard
- Two independent heating rooms

TECHNICAL DATA

- Electrical power supply V 200/208/220/380 3Ph
- Maximum power kW 13.2
- Maximum product dimensions mm 400 x 190 x L. *(The lenght depends on shape of product, belt speed, type of film, ...)*
- Machine dimensions mm 2130 x 800 x h.1460
- Machine weight (net/gross) kg 260/318
- Tunnel infeed dimensions mm 450 x 210

TUNNEL 50 TWIN GT

INNOVATION OPTIMIZES THE PROCESS

The **TUNNEL 50 TWIN GT** has been designed to be perfectly integrated with the Pratika automatic packaging machines. Thanks to the electrical and electronic components of Schneider Electric it is finally possible to check any aspect of retraction. Connecting the tunnel to a Pratika automatic packaging machine it will be possible to have all the parameter checked directly from the touch screen of the machine.

The double heating room with separated regulation, fans speed and temperature control, the exceptional termic insulation, the high passage and retraction speed, make this Tunnel the ideal machine to solve every packaging need with great effectiveness. The new plastic conveyor belt, ideal for high temperature, guarantees more stability to products and less wear.

TECHNICAL FEATURES

New control logic managed by PLC TM221 Schneider Electric with 9 customizable programs, 256 if connected to Pratika packaging machine
4.3-inch colour touchscreen console
Product conveyor
Adjustable double air baffles
Auto-off program
Outfeed roller conveyor provided as standard
Two independent heating rooms
Internal lighting for an ideal and safe vision
Transparent glass control window (world patent) Patent
Second inverter for motor fan speed regulation
Bump on the conveyor belt manually adjustable

TECHNICAL DATA

Electrical power supply V 400 3Ph
Maximum power kW 14.2
Maximum product dimensions mm 400x135 (with standard curtain)
Maximum product dimensions mm 400x200 (with curtain kit)
Machine dimensions mm 2170 x 910 x h.1460
Machine weight (net/gross) kg 294/352

TECHNICAL INNOVATIONS

- New control logic managed by PLC TM221 Schneider Electric with 9 customizable programs
- 4.3-inch colour touchscreen console
- Internal lighting for an ideal and safe vision
- Transparent glass control window (world patent) Patent
- Adjustable double air baffles
- Two independent heating rooms
- Conveyor belt in hi-tech plastic material
- Second inverter for motor fan speed regulation
- Bump on the conveyor belt manually adjustable

PERFECT INTERFACEABILITY

- Interface with Ethernet cable with the programs of every model of Pratika range; this allows to set up all the parameters (temperature, conveyor speed, fan speed) from the program that is showed on the packaging machine.
- Start/stop the operating cycle

TUNNEL OPTIONALS

KR250012 - KR090024

GUIDE KIT

Fixed to the tunnel's conveyor belt, this is the ideal solution for wrapping products that are unstable or irregular in shape. The 2 adjustable side rails allow it to hold products with a maximum width of 430 mm.

OPTIONAL ON THE FOLLOWING MODELS

KR250012 Tunnel 50 Twin
KR090024 Tunnel 50

FM710010 - FM710012 - FM710015

PTFE BELT

Suitable when working with very small products that might get stuck in the film roll and for working with polyethylene material at high temperatures.

OPTIONAL ON THE FOLLOWING MODELS

FM710010 Tunnel 50
FM710012 Tunnel 70
FM710015 Tunnel 50 Twin

KR250009

TUNNEL 50 TWIN GT HEIGHT ADJUSTMENT KIT

Comprising 4 supports fixed to the bodywork, it allows the height of the conveyor belt to be adjusted according to the input or output machine's working surface height.

OPTIONAL ON THE FOLLOWING MODELS

Tunnel 50 Twin GT

Min 770 mm
Max 1050 mm

RU140001

ROLLER TABLE 70 X 100

Unloading roller table for use where there is no automated line continuation after products leave the tunnel.

ADVANTAGES

Ideal for working with small products thanks to the number of rollers being doubled.

OPTIONAL ON THE FOLLOWING MODELS

Tunnel 70

RU020004

ROLLER TABLE 40 X 100

Unloading roller table with 15° incline. Length: 1 mt.

OPTIONAL ON THE FOLLOWING MODELS

Tunnel 50 / 50 Twin
